Professional Summary

Laravel/PHP Web Developer with professional experience building responsive, database-driven web applications for real-world business needs. Skilled in Laravel, PHP, MySQL, JavaScript, React, Tailwind CSS, and Bootstrap with experience across backend development, database-driven functionality, authentication, and responsive UI development. Focused on writing clean, maintainable code and building reliable web solutions with practical, user-focused interfaces.

Experience

MarkDev (Software House)

Bahawalpur, Punjab, Pakistan

Web Developer

2025-Present

- Develop and maintain Laravel and PHP applications with MySQL-backed data models.
- Apply MVC architecture and Eloquent ORM to organize application logic and database relationships.
- Build modules for student management, attendance, examinations, timetables, reports, payroll and certificates.
- Implement authentication and role-based permissions with branch-specific data access.
- Manage database migrations, form validation, and server-side processing for business workflows.
- Build responsive interfaces using Tailwind CSS, JavaScript, and jQuery.
- Integrate searchable data tables, dynamic forms, filters, and interactive dashboards.
- Troubleshoot application issues and collaborate on feature updates using Git and GitHub.
